As marketers, we recognize that people like information in quick hits: 30-second commercials, 140-character tweets, magazine ads — our eyes scan for all of 1.73 seconds.¹ Human beings have an uncanny ability to size up a situation quickly, and make fast, good decisions. In B2B, a brief positive corporate brand impression is a foot in the door to a longer conversation with a customer.

Yet brevity with B2B brands is a real challenge. It may feel like your brand needs 30 minutes to properly explain, but the reality is that most customers ask, "What do you folks do?" And in that moment of truth you've got a couple of seconds to answer. Do a good job in three seconds or so, and you earn the right to say more. That's why it's critical to craft a focused brand message that quickly communicates the essence of your brand. **3-30/3-30 messaging** is a technique to help you create that quick message, and assist you in developing consistent, longer messages to carry the discussion further. This technique can be used for product and company brands alike.

3-30/3-30 stands for: 3 seconds, 30 seconds, 3 minutes, 30 minutes.

It's a great rule of thumb for how people like to receive information: give me the headline, a few details and then more details if I need them.

At 5MetaCom, we use a message platform worksheet to build 3-30/3-30 messaging.

Tips on building your message platform

■ Apply and adapt what you know

Message development should be based on what you've already learned about your brand. At 5MetaCom, we use Discovery Research to identify various qualities of a brand, which are then expressed in a brand structure. This includes the brand's strategy, promise, organization, personality and values. At the core of the structure is the brand's essence or nucleus. If you have a position or strategy that has been informed by research, incorporate those ideas into your message platform.

■ Craft, then validate

A message platform can be drafted in a facilitated group setting, by an individual, by a team or by an agency. Regardless of the method used, the message platform should be validated internally and externally before it's put to use.

■ Lots of audiences, one platform

Resist the temptation to create separate message platforms for each audience. This will only add to workload and costs, while diluting impact. The corporate brand must stand for something singular across all important audiences.

■ Use the platform as a guide

The message platform is intended to provide rules for what to say about a brand, but it is not an ad or copy to use verbatim on marketing materials. The true purpose of the platform is to provide direction about what to say about the brand, not how to say it.

3-30/3-30 message platform

Example:

Company profile

Designs and manufactures high-end industrial power tools for use in commercial and civic construction

Brand nucleus

Safety built

Quickly communicates distinctive value and benefit of the brand

Main Message: Headline (3 seconds)

Safer working tools. Safer running jobsites.

Facts hold up and strengthen the 3-second headline

Support Messages (30 seconds)

"Safety-first" mission, mindset and controls—from design through to testing, manufacturing and the job site.

The #1 rated brand of construction tool for safety performance—and workers prefer our safer-working tools to all others.

History and legacy—company began as bridge builders who designed custom tools to make construction safer for our workers.

Evidence substantiates facts in the Support Messages

Proof Points (3 minutes/30 minutes)

Each employee—in all departments—required to spend 16 hours/year on a working construction job site using our tools.

Rated #1 brand for safety performance by Tool Lab Insurance Institute.

Company founded in 1947 as Bridge Construction, Ltd.

Company operates "Build-A-Plex"—the world's largest working construction laboratory for tool development and testing.

More than 30 Safety Design awards since 1975—3 times more than the next closest competitor.

At company inception, we introduced and used our first tool design, which reduced riveting accidents.

User panel of 150 construction workers across 12 countries tests and evaluates all tool prototypes prior to commercial introduction.

More workers own our tools in their home tool chests than any other brand.

In 1968, tool sales exceeded construction revenue, making the company the largest maker of "safety line" tools.

Only safety-tool maker that maintains 100% ownership and control of tool design, testing and manufacturing.

Exited bridge building business in 1975 to focus 100% on "safety line" tools.

Using the 5MetaCom 3-30/3-30 principle to develop a brand message platform helps deliver communication clarity across audiences. The message platform also informs the creative execution of the corporate brand, ensuring that whether the message is delivered by a website, an ad or employees, **the brand is always represented consistently.**
